VP700 accessories

Scorpio digital label finishers

The Scorpio Series are **all-in-one systems** that unwind, laminate for labels added durability (SCR22PL and SCR35PL only), digitally die-cut, remove the excess label material around each die-cut shape, slit, and rewind offering you everything to professionally and finish labels.

All systems provide a very accurate label finishing solution using cutting plotter technology. This allows you to cut different types of material and shapes on the fly **without the added cost of dies.**

The units are equipped with a cutter management tool that works together with a camera forming an integrated optical black-mark registration system providing cutting speed optimization and avoiding synchronization issues.

All features that turn into full flexibility, **limitless variations in label design and smooth workflow.**

The Scorpio Series are digital label finishers truly meant to meet the **on-demand short run label finishing** solution for use with digital color label printers and presses.
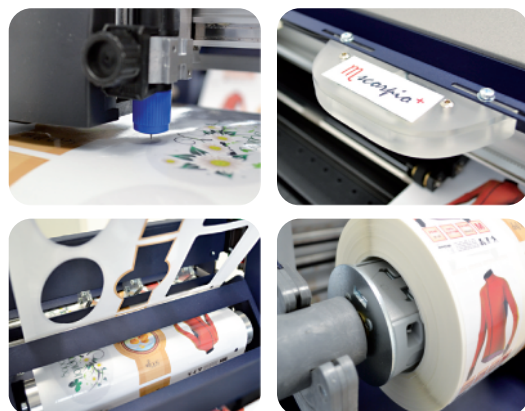

SCP22PL

Through the software, the operator imports the cutting file from Adobe Illustrator* or Corel Draw* and creates a black-mark inside the cutting file.

The **camera detects the black-mark printed on the media** and the software matches it with the black-mark created inside the cutting file.

The Scorpio series can be **integraded In Line with VIPColor VP700 Colour Label Printer,** in order to get an excellent solution for short runs.

Some benefits of using the Scorpio Series:

» Short run label production in-house means reducing inventory requirements and costs
» Producing full bleed labels will no longer be a nightmare
» Laminating for labels added durability (no need for special media)
» No need to order pre-die cut label rolls
» No need for ultra-precise label margin adjustment when printing in full bleed
» No need to set up a minimum gap between labels when printing in full bleed (saving on media)

"In-line" integration with VIPColor VP700 Colour Label Printer, for an end-to-end labelling solution.

* not provided with Scorpio, must be purchased separately
